

# DEER-RESISTANT PLANTS

Nothing is more frustrating than seeing plants in your landscape being eaten by hungry deer. If the best defense is a good offense, then it makes sense to start by tackling the challenge and choosing deer-resistant plants.

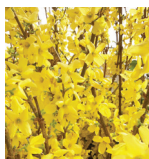

Bear in mind that virtually no plant is completely deer-proof. If deer are starving and they've exhausted all the desirable food in the area, they may look to your yard. Nevertheless, there are plants that are less favored by deer, including these popular varieties:

## TREES & SHRUBS

**Barberry**
